BETTER THAN PLASTIC. POWERED BY PLANTS. HIGH QUALITY FOODWARE FOR YOUR BUSINESS.

Finally. Low-cost, plant-based foodware for your business that *actually* works. We're disrupting the plastic industry and revolutionizing the foodservice experience with the highest quality plant-based straws, cutlery, and to-go containers. Our products are not only more sustainable, but also stronger than petroleum-based plastics. Take a step towards a more sustainable future. **Make the switch.**

Plant-Based Materials

Priced Competitively

Biodegradable

Breakthrough Technology

AGAVE PRODUCTS

Our straws and cutlery are made out of upcycled agave waste from tequila production. We take the leftover agave fibers and liquids to create a resin that we turn into our high-quality, landfill biodegradable products. Our plant-based materials are tested to degrade over 90% in the first 100 days and fully within 1-5 years in simulated landfill conditions.*

*ASTM D5511 Tested

BAMBOO PRODUCTS

To-go looks best in bamboo. Make the switch to our new, disposable foodware collection of clamshells, plates, and bowls made from natural bamboo fiber. Our high-quality bamboo products are biodegradable, compostable, recyclable and renewable.

 **Low Cost**

 **High Quality**

 **Plant-Based**
